

Project Abstract Requirements

Course: 096208 - AI and Autonomous Systems

Due: 22nd August 2024

Abstract Requirements

1. Group Members:

- **Name:** [Group Member 1]
- **ID:** [ID 1]
- **Name:** [Group Member 2]
- **ID:** [ID 2]

2. Field of Research: [Specify the specific field, e.g., Bidirectional Search, Memory Limited Search, Abstraction Heuristics, etc.]

3. Literature Review:

- Provide a summary of at least 3 relevant papers or works related to your chosen field of research.
- **Paper 1:** [Reference details and summary]
- **Paper 2:** [Reference details and summary]
- **Paper 3:** [Reference details and summary]

4. Work Domain:

- Specify whether your work is theoretical, involves simulators, or both. If your work includes simulators, try to specify which simulators you intend to use and how.

5. Work Outline:

- Provide a brief outline of your project's structure and objectives.

6. Initial Ideas/Work/Results:

- Summarize any initial ideas, work done so far, or preliminary results.

7. Additional Ideas (Not Guaranteed to Be Achieved):

- List any additional ideas or goals that may be considered but are not guaranteed to be achieved within the project timeframe.
